

Developing J2EE Applications with WebSphere Studio: IBM Certified Enterprise Developer (IBM Certification Study Guides)

Developed in cooperation with the team that created the exam, this book is the only certification study guide endorsed and recommended by IBM for test 287. It is designed to prepare Java programmers to fulfill the role of an IBM certified enterprise developer, supporting the jCert enterprise developer job role, which represents the highest level of Web and enterprise development. The most recent version of J2EE (Version 1.3) is examined and the rich features and functionality included in the WebSphere platform are presented. Programmers are guided through the myriad views and perspectives as well as the J2EE roles enabling them to build, test, assemble, and deploy enterprise applications the WebSphere way.
