

## Doctor Mooze

Panton di Villa was a ten year old British boy, who wanted to write an on-line diary (or blog) like some of his friends. As it happened, that was too much effort, so he looked for a book publisher instead. In Doctor Mooze you can see exactly what it is like to be a ten year old in England these days, where designer labels, drugs, sex and violence are the norm and the PS2 the last word in reality. This book isnt fiction and although written by a young boy is very definitely not one for the kids
